

Top reasons to purchase an Adobe® Digital School Collection K–12 Site License

The Adobe® Digital School Collection K–12 Site License provides software and supporting resources for teaching 21st century skills and engaging students in cross-curricular learning through digital storytelling projects. Here are top reasons why your K-12 institution should consider purchasing a Site License:

Integrate the latest digital technology into the classroom—

The latest versions of easy-to-learn Adobe creative and collaborative software applications—as well as ready-to-use lessons and other curriculum resources—help K-12 educators make 21st century digital communication skills an integral part of teaching and learning across subjects.

Engage and inspire students through digital storytelling—

New easy-to-use and automated tools give students the means to visually express what they've learned and observed, allowing them to go well beyond the restraints of a text-only presentation. Their digital storytelling projects and classroom presentations can include meaningful photos and photo books, compelling movies with professional-quality effects and sound, and media-rich documents.

Access teaching resources at the free Adobe Education Exchange—

The Adobe Digital School Collection is supported by ready-to-use lesson plans, tutorials, tips and tricks, video lesson examples, and more. It's all instantly accessible online at the free Adobe Education Exchange. Sign up for the Exchange and access resources at <http://edexchange.adobe.com>.

Work across operating systems—The Adobe Digital School Collection is available on Windows and Mac OS, simplifying deployment, training, and use in multiplatform environments. Teachers and students can work, transfer files, and collaborate more smoothly across operating systems.

Use entry-level tools as building blocks—Photo and video editing software applications, as well as ePortfolio-creation features and a PDF workflow, provide an ideal foundation for teaching and learning essential skills upon which professional-level skills can be built later. For example, high school students can quickly learn to use industry-standard Adobe Creative Suite® software if they already have mastered the use of Adobe Digital School Collection software.

Maximize your software budget—The Adobe Digital School Collection is available as 50- and 100-pack K–12 Site Licenses through the flexible Cumulative Licensing Program (CLP) or Transactional Licensing Program (TLP) volume licensing, giving schools and entire districts an affordable way to widely distribute this all-inclusive toolset for 21st century teaching and learning.

Present professional-caliber podcasts—Teachers and students can export audio and video to the web for rich-media podcasts that can be downloaded to personal computers and mobile devices.

Keep projects on track—Students can bring all their media together in the convenient Organizer, and they can use automated options to find their best photos and clips—or photos of specific people or things.

Produce extraordinary images with new Adobe Photoshop Elements 10—Give students powerful yet easy-to-use options for editing, enhancing, and finding photos; making custom creations; and sharing images via print, the web, and mobile devices. New shortcuts enable students to take their photos from flawed to phenomenal in one step.

Produce amazing videos with new Adobe Premiere Elements 10—Empower students to confidently import and organize clips; edit video themselves or use automated options; and share on virtually any screen. Students can apply professional-level techniques with InstantMovie, which automatically merges their best clips with coordinated music, titles, and video effects.

Create and share media-rich ePortfolios with Adobe Acrobat X Pro—Students can share their work with teachers and peers in a single, polished ePortfolio package using the PDF Portfolio-creation features. Teachers can combine and distribute interactive and media-rich classroom content using the same features, which include customized, ready-to-use templates. ePortfolios created with Acrobat X Pro also provide ideal means of demonstrating growth and assessing learning.

Easily share and present projects via popular online sites—Adobe Digital School Collection software and supporting resources include tools that make it easy for teachers and students to quickly share photos and movies virtually anywhere, including on Facebook, YouTube™, discs, Online Albums, and more.*

What's included

The Adobe Digital School Collection, available for Windows® and Mac OS, includes the following:
