

Increase productivity and process consistency

Save time and standardize processes by automating routine, multi-step tasks into a guided Action that can be applied to single PDF files or batches of files. See how simple it is to permanently remove sensitive information with the Action Wizard's help:

1. Choose the Tools pane located in the top, right corner of the application.
2. Click Action Wizard > Publish Sensitive Documents, and then click Next.
3. Choose Add Files from the Add Files drop-down menu, select the files you want to work with, and then click Next.
4. Click OK in the Using Redaction Tools box.
5. Select content to be permanently removed, click Next Step when completed, and then confirm by clicking Next Step again.
6. Check the types of hidden information you want to remove, click OK, and then save the file.
7. Click Close when Action is completed.
