

Adobe® Connect™ deployment options

The Adobe Connect web conferencing solution for enterprise customers provides additional flexibility, customization, and control by offering the following three deployment options: hosted, on-premise, and managed services. In addition to existing managed services solutions available from Adobe partners, we now offer a service that is fully managed by Adobe called Adobe Connect Managed Services.

Hosted	On-premise	Managed Services
Start collaborating immediately with just a web browser, Adobe Flash® Player software, and an Internet connection. Adobe manages everything for you, so there's no complicated hardware or software to install, set up, or maintain.	Deploy Adobe Connect behind your firewall and integrate it with your existing IT infrastructure, giving you complete control over how you set up your environment.	Outsource your IT management to us, and we'll take care of installation, upgrading, and management while you retain the control, security options, and customizability of an on-premise deployment.
<p>This solution offers:</p> <ul style="list-style-type: none"> • Immediate account access • Low initial investment • Reliable, redundant system architecture • High-bandwidth Tier 1 hosting center 	<p>This solution offers:</p> <ul style="list-style-type: none"> • Choice of network topology to meet your reliability, scalability, and accessibility requirements • Integration with your existing video telephony devices supporting SIP/H.264 and servers and applications, such as LDAP directory servers, Jabber, and Microsoft SQL Server • Additional customization options • Control over usage and maintenance costs • Ability to optimize performance with edge servers 	<p>This solution offers:</p> <ul style="list-style-type: none"> • Rapid time to value • Single-tenant hosted environment • Failover between geographically distributed data centers • 24x7 solution monitoring • Designated success engineer and special support points of contact • General maintenance, upgrades, and updates performed on your schedule • High degree of customization and flexibility, including single sign-on (SSO), Learning Management System (LMS), and video integration

Features and benefits
