To schedule a private demo, visit www.adobetechnology.com

Adobe RoboHelp (2015 release) empowers you to deliver engaging help, policy, and knowledge base content across mobile devices, formats, and platforms. Publish content as mobile apps, or in HTML5, EPUB 3, KF8, and MOBI. Help users find relevant content faster with dynamic content filters and contextual search results. Work more productively with a modern ribbon UI, customizable Quick Access toolbar, contextual tabs, and named conditional expressions.

Make content more findable—Easily create personalized help experiences. Use new dynamic content filters to generate enhanced DUC output, see how filtered content will look, and help users find relevant content faster.

Leverage next-generation mobile publishing—Take advantage of the new HTML5 layout to enhance the content consumption experience with smaller file sizes, faster loading times, smoother transitions, and out-of-the-box support for social widgets. Embed custom fonts in EPUB output and ensure that it looks as intended.

Deliver content-centric apps across major platforms—Increase consumption of your help content by making it widely available across iOS and Android platforms. Leverage native integration with Adobe PhoneGap Build* to publish content as a mobile app with just one click.

Work more productively with a modern interface—Take advantage of a new task-oriented ribbon UI to accomplish more in less time. Customize features like never before to create your very own optimized work environment.

VERSION COMPARISON CHART
