Import native Illustrator files into Flash CS3 Professional, or copy and paste artwork from Illustrator to Flash with paths, anchor points, gradients, clipping masks, and symbols intact. Layers, groups, and object names are also preserved.

Drawing tools and controls

Draw in Illustrator more quickly and fluidly than ever. Easier and more flexible anchor point selection, improved operating performance, and a new Eraser tool help you create artwork efficiently and intuitively.

Improved operating performance

Enjoy more responsive drawing and editing with improved performance in key operations, including faster screen redraw, object moving, panning, scaling, and transformations.

Control panel

Discover more options faster and free up screen space by accessing anchor point controls, clipping masks, envelope distortions, and more from the context-sensitive Control panel.

Eraser tool

Quickly remove areas of artwork with the Eraser tool as easily as you erase pixels in Photoshop, and enjoy complete control over the width, shape, and smoothness of the erasure.

New Document Profiles

Create artwork easily by selecting prebuilt profiles for various types of media, and save custom profiles that specify such setup parameters as artboard dimensions, styles, and color spaces.

Crop Area tool

Define crop areas interactively for print or export. Choose preset web ratios or video formats with safe areas, and set crop marks intuitively. Define multiple crop areas and easily move between them as needed.
